CONSULTANCY & PROJECT MANAGEMENT ROLE

Our consultancy-led approach ensured the project was delivered on time, on budget and to the highest standard. We managed the full process through initial site assessment and specification through contractor commitment, programme management and client communication.

We coordinated all stakeholders, mitigating risks and ensured compliance with safety, quality and local authority requirements throughout.

SOURCING A SPECIALIST FENCING CONTRACTOR

We carried out a full market search and appointed a fencing specialist with proven experience in industrial and secure perimeter installations. The contractor was selected based on technical capability, approvals, safety record and competitive pricing.

Their expertise ensured the works were completed efficiently, with minimal disruption to surrounding operations and the local community.

ON-SITE OVERSIGHT & QUALITY CONTROL

Our team provided full-on-site oversight throughout the works. Regular inspections ensured compliance with the specification, quality standards and health & safety requirements. We proactively managed many issues, maintained clear communication with the client and ensured the project stayed on programme and within budget.

WORK COMPLETED BY THE SPECIALIST CONTRACTOR

The contractor successfully completed the refurbishment and upgrades including:

- Replacement of damaged or corroded boundary fencing

Installation of new high-security metal, fencing and gates

Upgrades to existing manual vehicle entrance gates.

Finishing works including painting and protective coating

All works were completed to a high standard with full site clearance and handover.

MATERIALS & QUALITY ASSURANCE

All materials were selected for durability, security and low maintenance.

High-quality galvanised steel and powder-coated finishes ensure long-term protection against corrosion and weathering.

The contractor's works were carried out in accordance with relevant British Standards and industry best practices, with warranties provided on materials and workmanship.

CLIENT BENEFITS

- Enhanced site security and access control
- Improved safety for staff, visitors and the public
- Durable low-maintenance fencing and gate systems
- Minimal disruption for business operations
- Delivered on time and within budget
- Full compliance with safety and quality standards

WHY USE A CONSULTANCY-LED APPROACH FOR FENCING PROJECTS

A consultancy-led approach removes the guesswork and reduces risk. We bring independent expertise, industry knowledge and proven processes to ensure the right contracts is appointed and the project is delivered successfully.
